What is Cash Flow?

Scenarios

Group 1:

Your parents have just informed you that, if you want a car, you'll have to pay for it yourself. You're 14, and right now you get a small allowance, but you plan to get a job as soon as you can. In the meantime, you want to make sure that you save money so that you'll be able to buy your car.

Group 2:

One of your favorite bands is coming to town. Tickets cost \$50. All of your friends are going, but you're not sure you'll have enough extra money for a ticket. You have two babysitting jobs lined up for the next two weeks, but that leaves you a few dollars short of purchasing the \$50 ticket.

Group 3:

You've achieved your goal of getting a full scholarship to the college of your dreams. The only problem is that the scholarship will not cover the cost of textbooks, which you estimate will run you about \$500 for the first semester. You have the summer to save money, and you have a summer job.

Group 4:

You like to look very put-together for the start of the new school year. This year, you're on your own. No one is paying for any of your back-to-school clothes. It's the summer, and you have a few bucks stashed away in your room, plus a couple of jobs lined up mowing neighbors' lawns for money.

Group 5:

You want to have a savings fund of \$500 for future opportunities. You get some money for holidays and birthdays. You also make about \$10 a week selling game guides you created online.

Savings Options

Open a Savings Account

Opening a savings account helps you save money. Putting money into a savings account not only sets money aside so that you won't spend it, but it also gains interest slowly but surely.

Cut Back

Cut back on your spending. Think about the things you need versus the things you want. What can you afford to cut back on and still live a comfortable lifestyle?

OPTION 1

Go Cheaper

Of the things that you purchase, are they the least expensive brands? Are you willing to swap brand names with generic brands?

OPTION 2

Create New Habits

Sometimes, developing new habits can help you save money. Are you willing to change some of your habits in order to save money?

OPTION 3

Understanding Compound Interest Warm Up

Principal: An amount of money originally invested, excluding any interest or dividends

Interest: Earnings from lending money

Compounding: Calculating interest on both principal and previously earned interest

You have placed \$2,000 (called the principal) into a savings account. Your bank offers a generous interest rate of 5%, compounded annually. Using the table below, determine how much money your \$2,000 would increase to in five years.

Year	Balance	Interest	Total
1	\$2,000	\$100	\$2,100
2	\$2,100		
3			
4			
5			

Compound Interest Formula

$$A = P \left(1 + \frac{r}{n} \right)^{nt}$$

A = amount of money accumulated after n years, including interest

P = principle amount (the initial amount you borrow or deposit)

r = annual rate of interest (as a decimal)

n = number of times the interest is compounded per year

t = number of years the amount is deposited or borrowed for

Investment Vehicles

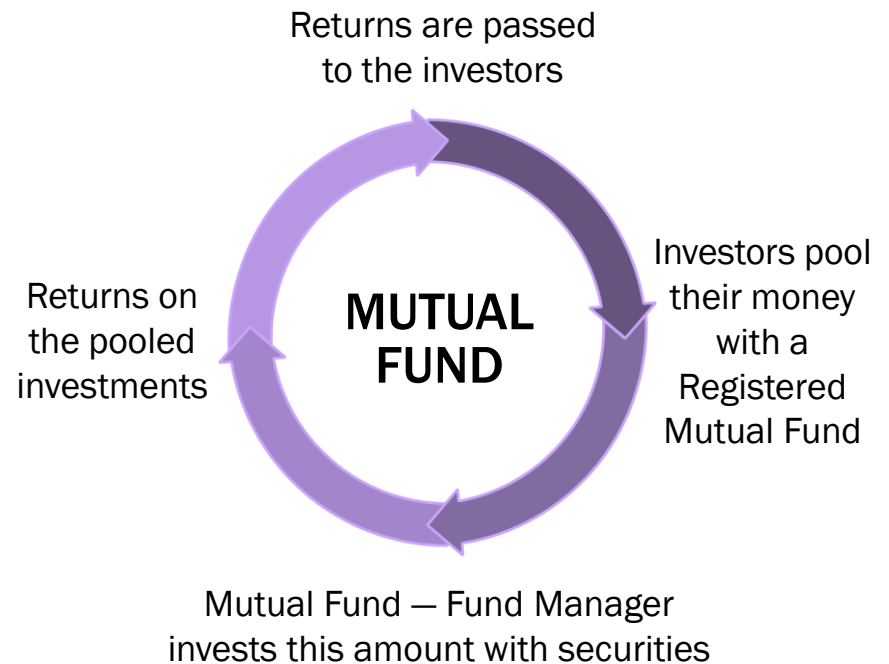

Stock

- Investment in a company
- Shares of ownership in a company
- Value of investment based on company performance

Mutual Funds

- Investments in several areas (companies, bonds, etc.)
- Diversified

Case Study: Three Stocks

Yum! Brands (YUM)

Yum! Brands owns such popular chains as Taco Bell, KFC, and Pizza Hut.

At \$73 per share, it sells for 20 times projected earnings, while yielding 2%. The company is expected to increase profits over the next 3–5 years.

Stock symbol: YUM

Today's share price: \$73

Target (TGT)

Target has 1,822 stores in the United States that sell everything from baby cribs to bananas. This retailer is expected to increase profits at a 15% pace in coming years. Shares are \$84 each as of October 2018.

Stock symbol: TGT

Today's share price: \$84

Walt Disney (DIS)

Walt Disney owns several business interests: animated films, theme parks, and the sports network ESPN, among others. At \$116 a share, it is expected to increase profits at a 15% pace for the next several years.

Stock symbol: DIS

Today's share price: \$116

Share prices from 10/04/2018
