

Busey's New Online Banking & Mobile App

COMING JANUARY 27

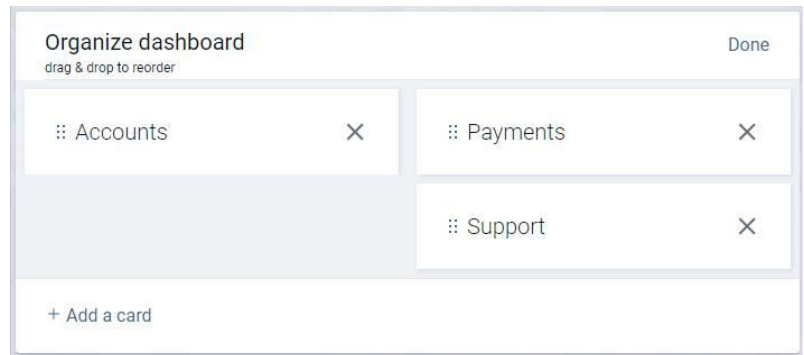

Customizing Your New Busey eBank Dashboard

Follow the instructions below to customize the dashboard of Busey's new online banking platform and mobile app:

Desktop Version through an Internet Browser

Upon successful login, you'll notice a refreshed eBank layout and design. One of the great advantages of this new system is complete control over your dashboard—configuring the display to meet your unique financial needs.

To adjust your display or create a dashboard similar to the old Busey eBank or TheBANK Magic Online, customers should choose the option to *Organize Dashboard* at the bottom of the dashboard. From here, you're able to configure your dashboard—removing, reordering and choosing the display for each feature. Simply drag and drop to organize the options – as you see in the screenshot - to closely matching your previous online banking experience.

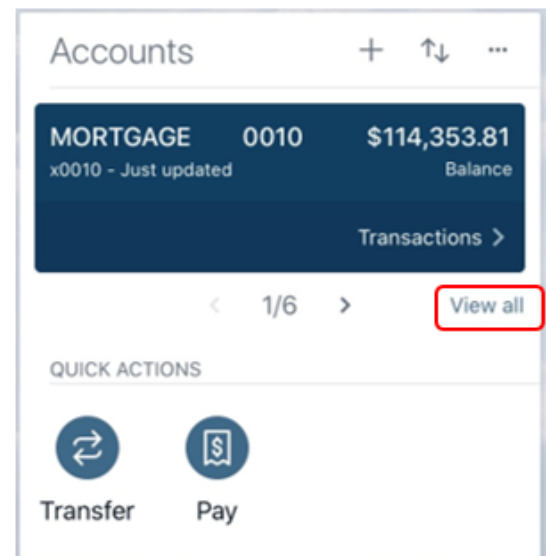

Mobile Version through the Busey – Mobile App

Previously, the Busey Bank and TheBANK mobile app displayed accounts in a list view with secondary services available through the Menu option.

In the new Busey – Mobile app, accounts are listed horizontally so users must swipe left-to-right to view each. To view all accounts in the new app similarly to the old list view, select *View all* from the accounts screen.

This will display accounts in a list view that most closely matches your previous mobile banking experience. When viewing accounts in the list view, you can reorder accounts by dragging-and-dropping the list to create a preferred order on the dashboard.

As we upgrade Busey's eBank & Mobile App, we're dedicated to providing the support you need. Visit busey.com/pavingthefuture for an overview of the changes—including helpful [how-to videos](#) that detail topics like logging into the new system to customizing your account dashboard, setting up alerts, managing your cards and more.
